

# Animal Dreaming REGISTRATION Form

*discover your own animal dreaming*

"When we look to the medicine ways of nature, we see the earth and all the creatures that live upon it, as messengers imbued with particular characteristics that offer insight into our own true natures. When we open ourselves to the guidance of our animal teachers, we receive confirmation of our innate strengths and the medicine we need to heal life's sorrows. When we experience interdependence with all life, we find our own honoured place in creation."

*Scott Alexander King*
